Above is the website link of your store.

After creation of website and android mobile app for your store, i will be sending a link like above.

On clicking the link you will go to main menu of your store

==*==*==*==*==*==*==*==*==*==*==*==*==*==*==*==*

Next step

In this main page of your store you will see the store name , what items you are selling, for each branch you will find a button

From this page you can download the mobile app also.

On installing the mobile app and opening , this will be the first page for your store

Next step

Alternative way to open the first page of your store in laptop or computer as website, follow the below steps

Step 1	In chrome browser type <u>www.chulinks.in</u>
Step 2	Click button 
Step 3	Click button 
Step 4	Click your shop button

List of Items and Login procedure

On clicking the Branch button, you will see the List of items available in this branch with price and photo

This page should be sent to customers (**Website link to send in whatsapp copy the below line and paste)**

If customer wants to purchase, he will click login (shop owner should also click this)

(only for the first time) Customer or shop owner should create account so **click New user = enter 10 digit mobile number and 6 characters for password, click create.**

Then login with above details (mobile and password)

(get password by sms = will work within India only, this sms will be accounted in respective shop and collected in next month bill at the rate of 35 paise per sms)

Next page will the ordering page.

If you login with mobile number you have provided in your visiting card, you will treated as store owner. Now only you can access all menus.

Item menu := only shop owner will have access to this menu

Item := Add item := You can add single new item ,

Item name= for Indian languages other than tamil add within square bracket [] e.g. [केला]. Then you enter hsn code, MRP, amount after discount, tax etc.

Item := Add same := same as above,

For example you want add 100 silk saree of same material, price but design and color are different. Use this menu. On clicking the add button, you will see counter

Item := Search Item := you can search item gives rate, stock status

Item := No Stock := You can change the status of one item to No Stock, it will not list to customers(use item id)

Item := Yes Stock := Once stock is available You can change the status of one item to Yes Stock(use item id)

Item := Edit Item := You can edit the item details in future

Item := change rate Search := Search for an item

On clicking the change button, you can alter discount rate and MRP, finally click update button, similiary click for stock status

Item := Change rate list := for all item, you can above details.

Display := upload Image := Enter Item no and browse jpg file and click upload.

Display := List yesstock := List yes stock items only

Display := List Nostock := List No stock items only

Login menu := Online := To place order by Customers

Order menu := only shop owner will have access to this menu

- **Order menu := Date List := To list order on a particular date**
- **Order menu := Locate order := To get particular order number details.**

Additional Facilities given by us :

Uploading data :

Already if you are using some software from which you can take output in txt , pdf , xls with item description, rate etc. Send that to me. I will upload for you.

Or you can take print out in A4 sheet, take photo in mobile and send the images. I will upload for you.

SMS service :

After creting the item list in Online, you may want to intimate or send link to your customers . I have bulk SMS facility at the cost of 35 paise per SMS.

On dispatching parcel, you may want to send dispatch details to individual customer. We provide support for this also.

Whatsapp Service :

You may want to send text messages in Whatsapp which are longer than 160 characters, I can help you to send. I just need only mobile numbers.

Tailor made to your need :

If you have any special requirement in programming, indicate us. We modify for your need and state of art.
